

# Spezial-Sensors for Automation

## Temperature Controller

- Compact model
- Programmable
- 2 Switching points
- Analog output

ISO 9001  
certified

# TEMPERATURE CONTROLLER

## Technology and application

### Functionality

The compact models TN 552 GPP and TN 552/1 GPP have two independent adjustable switching points. The compact models TN 552 GAPP and TN 552/1 GAPP have one independent adjustable switching point and one scalable 4...20 mA analog output.

The detecting range for fluids is from  $-40\text{ }^{\circ}\text{C}$  to  $+120\text{ }^{\circ}\text{C}$ , the tolerance is  $0.3\text{ }^{\circ}\text{C}$  ( $0\text{...}80\text{ }^{\circ}\text{C}$ ).

The compact models TN 552... offer a window function as an alternative to the standard limit monitoring. Additionally, the NO/NC output function is programmable. Transient temperature changes can be bridged with a switch-on / switch-off time delay.

The push-buttons on the front of the sensor are used for programming the sensor functions. The programmed switching point and parameters are displayed and set by keyboard request. This function is possible while the sensor is measuring.

### Installation

The compact models TN 552... can be installed in standard T-pieces or welded T-pieces. The packing is made with an additional flat seal or with other suitable materials. Please note the temperature and pressure resistance of the seals for increased process conditions. Fixing the sensor in the T-pieces is only allowed on the screw head of the sensor.

After the installation the display can be turned through an angle of  $330^{\circ}$  for best reading. In applications with temperature over  $+80\text{ }^{\circ}\text{C}$  the sensor should be mounted from the side into the pipe.

### Application

The hysteresis function is for controlling a temperature value. A limiting value can be programmed in this mode. As soon as the measured temperature is higher than the programmed limiting value, the output signals are switched as programmed (NC or NO). The hysteresis value is the difference temperature for the switch-on and switch-off signal of the limiting value. An additional time delay for the switching signals can be programmed for each switching point.

In the frame function mode the switching function is set depending of a programmed temperature range. The temperature range starts with the programmed lower value and end with programmed upper frame value.

The time delay for the switching signal can also be used in this switching mode.

The analog output can be use for transmitting the temperature and getting the proportional current. For that you assign one temperature for the 4 mA first-value and one temperature for the 20 mA last-value in the programming mode. Between the temperature values it is permissible to have a minimal difference of  $16\text{ }^{\circ}\text{C}$  /  $29\text{ }^{\circ}\text{F}$ .

### TECHNICAL DATA

Protection	IP 67	Rated voltage	250 VDC
Contact resistance	≤5 mΩ	Insulation resistance	>10 <sup>9</sup> Ω
Switching resistance	4A (CSA=3A)	Testing voltage	2.0 KV eff.
Temperature range	-25...+80 °C		

### Note

Sensors with NC output are connected to 4 pole cable plug housings. In this case, the break output is connected to the white lead (connection 2).

# PROCESS-SENSORS

## A selection

### Flow Controller

- Electronical monitoring of flow
- Lubrication monitoring
- Minimum rate 1 ml/min
- Reaction time 0.5 s

### Level Controller for Ex-applications

- For level monitoring in Ex areas
- For temperatures -35...+200 °C
- With PTFE connector cable
- Sensors for connection to amplifiers

### Level Controller

- For level monitoring -35...+200 °C
- For hot motor oil
- For liquid nitrogen
- For leakage detection
- For chemically aggressive media

### Ultrasonic

- Switching distance up to 5000 mm
- Level monitoring
- Watertight housing
- Teach-in functions

### Pressure-Controller

- Monitoring in pipes and containers
- Pressure up to 16 bar
- Level up to 10 m ( $\pm 1$  cm)
- Compact models
- Programmable

### Infrared Detectors

- Measurement of temperature
- Monitoring of hot media
- Position control
